

HEALTH, SAFETY AND ENVIRONMENTAL POLICY

Fores Engineering S.r.l. operates internationally implementing integrated technologically advanced industrial solutions as skid mounted package units, shelter for electrical and instrumentation system, hydraulic power generation units and wellhead control panels, emergency shut down / fire and gas systems, electrical and control panels, telecom system, security systems for chemical, petrochemical, oil and gas, refinery and other process industries.

The respect for health, safety and the environment together with the commitment to eliminate hazards and reduce risks is not simply a regulatory requirement; it is an ethical and cultural model founded on the awareness of the natural and fundamental rights of people and the environment in which they work and live.

As a lasting and indelible development process, Fores Engineering Management promote and share with all business departments to operate in accordance with applicable laws and regulations and to take the utmost care to share a culture rooted in health, safety and the environment at all levels.

Fores Engineering Management set the short, medium and long-term health, safety and environmental goals. These must be achieved within the scope of continuous development and monitored through performance indicators, triggering a virtuous research for excellence.

The use of processes, materials and technologies which can avoid or reduce the risk of pollution and are focused on optimising the consumption of raw materials and maximum energy efficiency is a milestone with a view to environmental protection.

Fores Engineering Management is committed to effectively carrying out divulging, informing and training activities for staff so that they may acquire and continue to develop complete awareness of their role and the context in which they work, with special attention to engaging and consulting with workers and their representatives.

Fores Engineering Management thanks everyone and commits to daily supporting and guaranteeing the cultural paradigm set out, promoting its widespread diffusion within the company, among suppliers and contractors.
