FORES ENGINEERING

HEALTH, SAFETY AND ENVIRONMENT POLICY

For over 30 years, Fores Engineering S.r.l. has been operating internationally, providing customers with high-tech industrial solutions including process systems, auxiliary systems, automation and telecommunication systems, and technical services for the chemical, petrochemical, Oil & Gas, refinery, and other process industries.

In all aspects of our business, we have incorporated factors such as health, safety, environment, energy efficiency, and prevention, and we are committed to **achieving excellence and continuous improvement**.

OUR AMBITION

In addition to fulfilling our obligations of legal compliance, we are committed to:

- **Providing safe and healthy working conditions for the prevention** of work-related injuries and illnesses, a constant effort to eliminate hazards and **reduce risks** in the workplace environment, adopting a systematic approach to risk management for **risk analysis and identifying opportunities for continuous improvement** in health, safety, and environmental protection outcomes, including goal setting and regular monitoring of indicators.
- **Protecting and preventing adverse effects on the environment, increasing resource efficiency, including energy, water, and materials, and supporting efforts to combat climate change**.
- **Promoting information, training, and consultation activities** for direct staff and all those who collaborate with the company, to increase awareness and responsibility, report unsafe behaviors, recognize good practices, and engage employees and their representatives.

We regularly update these commitments to ensure that our governance consistently incorporates our values and strategic direction.
