QUALITY POLICY

Quality, a fundamental value characterizing processes, functions, and people.

For over 30 years, Fores Engineering S.r.l. has been operating internationally, providing customers with high-tech industrial solutions such as process systems, auxiliary systems, automation and telecommunications systems, and technical services for the chemical, petrochemical, Oil & Gas, refinery, and other process industries.

Our commitment to quality is ensured by the adoption and updating of management systems, and the constant effectiveness of these systems is ensured by the implementation of both internal and external audits.

OUR GUIDING PRINCIPLES

- **We are committed to meeting the expectations of our customers by offering our expertise and knowledge**: Our priority, while respecting and safeguarding the environment, is to achieve complete customer satisfaction to attain a high level of loyalty.
- **We firmly adhere to current laws and regulations**, with particular attention to corporate administrative responsibility, following high ethical standards and social responsibility.
- Continuous improvement is at the heart of our thinking and action. We encourage and guide our people in the pursuit of **continuous improvement in processes and performance.**
- We activate an adequate monitoring system to achieve defined objectives.
- We identify, monitor, and control commercial and operational risks through a systematic approach based on knowledge and verified facts.
- **People are the cornerstone of our success. We value our people** through continuous training and development so they can contribute to the effective functioning of processes and integrate into an ever-evolving corporate environment.
- **We maintain a constant focus on sustainability and innovation. We develop projects for technological innovation** that will be realized through strategic collaborations with industrial operators and the academic world to accompany the company's digital and energy transition.
- We define and ensure high-quality standards for our suppliers and partners, just as we do for ourselves.
